

Q-Storming®

A QuestionThinking™ Practice for Breakthrough Results

Marilee Adams, Ph.D.

Q-Storming is a collaborative thinking and creativity process, akin to brainstorming, that stimulates the discovery of new questions and new possibilities. It is so powerful because *great results begin with great questions*. It often makes a breakthrough difference in decision-making, problem-solving, strategic planning, and innovation. Q-Storming is valuable for teams or groups and for individuals in contexts such as coaching, management, and sales. We offer two levels of training in the Q-Storming process. Corporate in-house trainings are also available.

Many companies and agencies have benefited from Q-Storming sessions, including: Lockheed Martin, DHL, Johnson & Johnson, Seiman's, Johns Hopkins, NASA Goddard, the Brookings Institution, the National Defense University, NSA, and the U.S. Departments of Education and the Interior. Q-Storming always gets an A+.

"Q-Storming is an extremely powerful process for getting breakthrough results as well as for empowering how you think". Larina Kase, PsyD. MBA
